# About NSquare Technologies, INC.

**N Square Technologies, Inc.** *is an ERP developer, multicultural advertising agency, and marketing communications firm specializing in the fast emerging Point Of Sales market.* In 5 years, we have grown tremendously, but we've always kept our focus on individual customer relationships. We deliver the resources and capabilities of a large company with the individual attention you would expect from a small company.

We create marketing visions, and innovative multicultural campaigns around those visions, so you can gain market share and customer loyalty with your target audience. *Our approach is both strategic and tactical, helping you establish a lasting relationship with your constituents while accomplishing your immediate objectives.* Finally, we ensure that your campaigns are cost-effective, measurable and results-oriented.

Our corporate experience covers Fortune 500 firms to small and mid-size companies. *Our category and market experience covers Advertising, Banking, Education, Entertainment, Financial Services, Franchising, Government, Technology, Medical, Non-Profits, Publishing, Real Estate, Remittance, Cable/Dish, Telecommunications and Travel & Tourism.*

No matter what industry or culture you represent, we would be delighted to discuss your solution needs. In 5 years, we've watched many competitors come, and go. We've watched an internet equity bubble expand, and burst. And, we've seen incredible technological change. None of this has made much difference to our strategy. *We simply deliver the best digital network resources, the most efficient consulting and the most effective marketing and advertising service.* We've done that every day for the last 5 years, and we'll keep it up for the next five. Call or email us and we will help you explore new way of business.

*Danny H Lee*
